

Содержание

Уважаемые взрослые! 2

МАТЕМАТИКА

Сложение и вычитание 5

Цепочки примеров для устных и письменных работ 16

Решаем задачи и выполняем вычисления.

Повторяем изученное во 2-м классе 29

РУССКИЙ ЯЗЫК

Упражнения на все правила и орфограммы 61

Правописание гласных и согласных в корне слова 82

Тестовые задания на все темы и правила.

Повторение пройденного во 2-м классе 93

Уважаемые взрослые!

Перед вами уникальное пособие, которое содержит все виды заданий по математике и русскому языку для 2 класса.

В разделе «Математика» ваш ребенок повторит и закрепит все навыки счета:

- простое и раздельное сложение и вычитание в пределах 20 и 100;
- сложение и вычитание в пределах 100 столбиком;
- решение математических цепочек примеров;
- решение разных видов задач с использованием краткой записи и схемы.

Задачи и примеры, предложенные в пособии, помогут ребенку отработать и закрепить до автоматизма навыки счета, полученные на уроках математики во 2 классе, а также — активизируют мыслительную деятельность, разовьют память, внимание, быстроту реакции.

В раздел «Русский язык» включены упражнения и задания на все правила и орфограммы школьной программы за 2 класс.

Знание правил — основа грамотного письма школьника. Выполняя задания пособия, ваш ребенок выучит и закрепит все правила за весь курс 2 класса.

Повторяя изученное во 2 классе, второклассник прямо в пособии сможет пройти тестовые задания по русскому языку за весь курс 1 и 2 классов.

Пособие может быть использовано дома для закрепления изученного материала, во время каникул для быстрого повторения той или иной темы учебного курса, а также — на уроках математики и русского языка в школе для проведения самостоятельных работ.

Желаем вам успехов!

МАТЕМАТИКА

СЛОЖЕНИЕ И ВЫЧИТАНИЕ

**ЦЕПОЧКИ ПРИМЕРОВ ДЛЯ УСТНЫХ
И ПИСЬМЕННЫХ РАБОТ**

**РЕШАЕМ ЗАДАЧИ И ВЫПОЛНЯЕМ ВЫЧИСЛЕНИЯ.
ПОВТОРЯЕМ ИЗУЧЕННОЕ ВО 2-М КЛАССЕ**

Основные приемы счета формируются у ребенка в первые годы обучения. Именно поэтому очень важно уделить отработке этого навыка особое внимание.

В блоке «Сложение и вычитание» ребенок отработает навыки сложения и вычитания в пределах 20 и 100, сложение и вычитание круглых чисел; сложение и вычитание столбиком.

Решение математических цепочек и примеров также поможет вашему ребенку отработать и закрепить до автоматизма навыки счета, подготовит к выполнению более сложных вычислений на умножение и деление.

Выполняя цепочки примеров, ребенок должен хорошо запомнить последовательность действий.

Если в выражении нет скобок, то действия выполняются по порядку слева направо.

$$4 + 5 - 2 \quad a + b - c$$

Всегда сначала выполняют действия в скобках, а потом остальные по порядку.

$$3 + (8 - 2) \quad a + (b - c)$$

В выражениях со скобками сначала вычисляют действия в скобках, затем по порядку слева направо выполняется:

- 1) умножение или деление,
- потом
- 2) сложение или вычитание.

$$c \cdot (a + b) + b : c - a$$

Задачи, предложенные в пособии, также помогут ребенку закрепить навыки, полученные на уроках математики во 2-м классе. Ребенок научится решать задачи, используя краткую запись и схемы.
